unchanged. The total sales of stocks to-day were 247,712

shares, including the following: Delaware, Lackawanna & Western, 30,000; Delaware & Hudson, 5,302; Erie, 4,100; Lake Shore, 5,650; Missouri Pacific, 9,920; Northwestern, 14,925; Norfolk & Western, preferred, 3,925; New Jersey Central, 4,435; Northern Pacific, preferred, 3,045; Reading, 31,950; Richmond & West Point, 21,505: St. Paul, 29,725; Union Pacific, 6,900.

The stock market was much less active to-day, but a better tone prevailed, and notwithstanding several drawbacks, the list is generally higher this evening. The favorable advices from London in regard to the settlements there had a good effect, and the foreigners were buyers of stocks here this morning, which encouraged purchasers for local account, and the entire list shared in the resulting improvement. After the first demand had been satisfied there was an attempt by the bears to again depress the list, the stocks chosen for the purpose being Rock Island and Missouri Pacific, which have been the instruments of similar raids for some time back, but while considerable impression was made upon the list, the drive failed of its object. Delaware & Hudson became a feature of the dealings and suddenly shot up 3 points from its last night's price, and many rumors were circulated to account for the advance. The most generally believed, however, were that some a stock dividend was expected by many because of the application of the surplus earnings to the retirement of bonds, for which stock is to be issued at 75, had some effect, and rumors of buying for inflential investors gained some credence. This movement was of marked effect upon the list, and was afterward followed by a spurt in Richmond & Danville and Richmond & West Point. The grangers were freely sold on the fresh cuts in passenger rates in the West, and Rock Island was the weak spot in the list for

There were some \$1,700.000 taken for export to-day, but the improved feeling over the situation in London prevented this fact from having a marked influence upon the course of prices today. New England was very strong at one time, but all of its advance was lost on sales for Boston account, when it became known that the old ticket was successful at the election to-day. The opening figures showed advances over last evening's prices, extending to ½ per cent. this morning, but the list weakened immediately under attacks upon Rock Island and Missouri Pacific, both of which retired over a point. But the recovery was sharp, and everything was carried above first figures, except the prominently weak stocks, and Delaware & Hudson early came into notoriety by its sudden rise. There was considerable feverishness shown, but the general drift continued toward higher figures, with Jersey Central, and later the Richmond & West Point stocks, the special features. After Delaware & Hudson reacted, however, there was a general sagging of prices, and in the last hour New England developed marked weakness. The close, bowever, was quiet and fairly steady, generally at but slight fractions from the opening prices. The trading was confined more than usual of late to a few of the leading stocks. The declines among the active stocks this evening are few and unimportant, while Delaware & Hudson rose 3 per cent.; Richmond & West Point preferred, 2; Manitoba, 1; Lackawanna,

1t. and Jersey Central, 1 per cent. The trading in railroad bonds was even less interesting than usual of late, and the only feature of the day was the animation in the Richmond & West Point trust sixes, which contributed \$119,000 to the day's total of only \$724,-000. The tone of the dealings was generally steady to firm, and while the final changes are in most instances in the direction of higher figures, they are for slight fractions only, except in a few issues. The important advances include Cedar Falls and Minneapolis firsts, 7 to 78; Indianapolis, Decatur & Springfield firsts, 2 to 102, and Northern Pacific seconds, 2, to 111.

GRAIN AT CHICAGO.

Tone and Temper of the Speculative Market -The Prospect for the Future.

CHICAGO, Dec. 11.—The bullish momentum gained yesterday was still felt at the opening this morning, and the wheat market started off at an advance over yesterday's close. There was trading in May at the opening at the range \$1.107 @ 1.113. When the smoke cleared away somewhat, the market commenced to ease off, and speedily worked its way back to \$1.101 @ 1.104. A recovery to \$1.10; followed, and the next move was back to \$1.10%. The price soon found its way back to \$1.10%, and off again to \$1.10%, around which point it hung a long while, finally oreaking sharply, about noon, to \$1.092. A quick rally to \$1.101 was the next feature, after which there was a break to \$1.09], a depreciation of 120 from outside price obtainable around the opening. The last hour of trading was the extremes. The early firmness was occasioned by strong cables, bullish news from the Northwest relating to the movement from farmers' hands, and receipts at Minneapolis and Duluth, and to a continuation

of the local buying fever that set in during the last hour of yesterday's session. New York re-ported a moderate inquiry for foreign account, and some buying of futures for Old-world peo-

ple; indeed. New York was firmer all day than Chicago. The basis of the improvement in the tone of foreign markets seems to be a growing scarcity of good milling wheat, both on the con-tinent and in Great Britain. The Daily Business says: There is now little doubt as to the true condition of things in the Northwest. Farmers' deliveries of wheat are exceedingly light, farmers' reserves are generally very small, country elevator stocks are be-ing reduced rather than increased, and however much

demoralization there may be in the market for offgrade stuff, the millers continue to compete sharply for the good milling wheat that comes forward. The side-tracked cars at Minneapolis are falling off in number, and arrivals, too, are showing a decrease. The break in prices that occurred here was due to the The break in prices that occurred here was due to the discovery that some of the big operators who have been builing the market lately were quietly selling their property. This discovery was the cause of free selling by Milmine-Rodman; Kammerer, Kennett, and many others of the scalpers also turned in and helped the market down. Hutchinson was also a seller early, and a buyer later, and on the break Fairbank, Kennett, Kammerer and Ream were good buyers. Fairbank's buying checked the decline at \$1.093s, and turned the market back again 1423sc, but on the little rally the crowd seemed again 423sc, but on the little rally the crowd seemed determined to "fill him up." In this purpose they apparently succeeded, for the prices eased off once more to the inside figures of the day, but there was nothing of a slumpy or panicky feeling discernible. The army of pit traders and scalpers are now directing their attention and talents to the work of antici-pating the movement of a few of the leaders whom they accuse of systematically milking the market. The market is not in a condition to invite adventures based on anticipation of a long cam-

paign either way. Prices for several weeks have fluctuated within a couple of cents of to-day's closing quotations, and the position and relative strength of the opposing parties does not seem to have undergone any change of consequence in that time. 'The "bear" party points to the larger stock of flour than last year (1 .-250,000 barrels according to Bradstreet's), as offsetting the 6,000,000 bushels smaller visible supply, while the "bull" leaders are unshaken in their faith. They do not tire out nor frighten out. "They will only go out on a big break or a big advance," said one of their advisory friends to-day. They are at this moment clearly in a position to check any attempts to create a big break, and they seem indisposed to organize a big advance at the moment, preferring, appar-

Cheese steady; fair demand; Western, 10@11]c. CHICAGO, Dec. 11.-The bullish feeling which set in yesterday was apparently doomed to be of short duration. The opening this morning was 10 to higher than the closing figures of yesterday, being a continuation of the firmness prevailing yesterday, but the advance was met by liberal offerings and prices declined 12c, closing about le lower than yesterday. "Shorts" evidently covered freely yesterday, and there was less demand from that source, as well as others, as the news to-day was not as favorable to the "bull" interest. Corn was quotably easy, with trading of a local character, fluctuations being within ic range. Opening sales were at yesterday's closing prices, the market ruling firm for a time. A large local trader bought freely, but when he withdrew from the pit a ic re-action occurred, which, however, was soon recovered when the estimates for Wednesday came in, they being smaller than the recent average. At the advance offerings became quite free and an easier feeling followed, the market closing twice lower than yesterday. Oats were moderately active, but unsettled. The near futures were stronger and advanced &c. with very little trading, and after buyers withdrew prices declined rapidly. Trading in May was liberal, especially during the last hour. "Longs" unloaded freely, and prices declined #@ic from opening figures. At the bottom buyers took hold freely and a slight rally followed, the market closing steady. Quite a good business was transacted in mess pork, mainly in January and May deliveries. At the opening the feeling was rather weak, with free offerings, and sales were made at 10 @ 12 c decline on yesterday's closing figures. Prices further receded 21 @5c, but railied 121 @ 15c, and ruled comparatively steady to the close. A comparatively weak feeling was manifested in lard at the opening, and offerings were moderately free at .07 a. 10c decline. Later, the demand was quite active, and the market exhibited considerable strength. Prices rallied again .071 @.10c, and ruled comparatively steady to the close. Considerable interest was exhibited in the short-rib market, and speculative trading was rather active. Early in the day prices ruled .10 .12 to lower. Later, the market rallied .05 .07 to, and the market closed steady at outside fig.

Fine Weather, Firm Prices, and an Easy Money Market Stimulating Trade. INDIANAPOLIS, Dec. 11.

In most departments the volume of trade is fully up to expectations and in some lines of goods it exceeds the most sanguine predictions on the first of the month. Grocers are seemingly the busiest. During the rainy weather and the bad country roads stock s of the retail country merchants became a good deal depleted, and they are now stocking up liberally, and with the freer movement of the corn and hog crop money is more plenty. Dry goods men, as well, are experiencing an excellent trade, and prices carry a strong tone. Owing to the mildness of the weather woolen goods have not sold as well as had been anticipated, yet there has been a fair movement. In fancy goods and notions sales are large and very satisfactory. The provison market is rather flat, and prices weak at the revised quotations of Monday. Packers say that they are paying too much for hogs, but are obliged to do so to keep them from going to other markets. The produce markets are moderately active. The stock of inferior apples has been considerably reduced of late, and standard apples are coming on to the market quite freely. The commission men are working to spring prices, but find it uphill work, and good apples are still selling at \$1.75 to \$2 per barrel. Potatoes are hardly as firm as a week ago, aithough not quotably lower. Poultry is steady at quotations, while both eggs and butter are weak, and lower prices may be looked for unless the weather should become colder. Other markets are featureless.

There was a better attendance on 'Change to-day, and a little more interest is shown in the bidding, but there is still large room for improvement. Prices ruled as follows:

Wheat-Receipts, 15 cars. Market quiet. The demand is entirely from the local millers; No. 2 red, \$1.01@1.021; No. 3 red salable at 93@ 98c; rejected at 75 @85c for poor to good samples, and choice at 86 @ 92c.
